

Due to the predicted persistent south/south westerly wind forecasts, the committee is looking at the possibility of running time trials to seed crews for 6 lane, side by side finals. Should this decision be taken, it is planned to utilise lanes 7 and 6 for racing crews, starting crews with odd numbers in lane 6 and crews with even numbers in lane 8. Should the wind direction alter the lanes you will be informed by marshals as you leave the warm up lake. Time trial race times may not be the same as your original race times, so in the event of a decision being taken please look out for announcements at crew control, on twitter and over the PA system.
